METALLIC CERAMIC TILES

SPECIALISTS IN CERAMIC DESIGN WITH METALLIC FINISHES

Leaders in Physical Vapor Deposition metallization for tiles

With our advanced PVD technology, we create metallic finishes with exceptional depth and purity—surfaces that stand out within the world of contemporary materials. From gold and silver to bronze, violet, and navy blue, each piece reflects precision and impeccable craftsmanship.

Our large-format porcelain tiles, available in sizes up to 120×300 cm, bring the sophisticated touch that modern interior design and architecture need to stand out. Their metallic tones—essential in defining contemporary spaces—offer a bold yet balanced aesthetic, with subtle reflections that transform the atmosphere of any environment.

We work across a wide range of projects, from high-end hotels to iconic boutiques. Our pieces are recognized for their innovative design, striking textures, and unique character. Each project becomes a statement of style, where distinction, originality, and long-lasting performance converge.

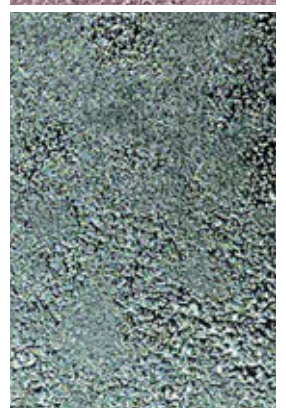

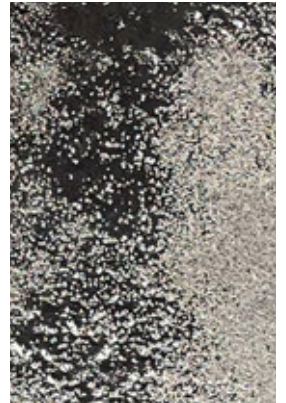

ESPECIALISTAS EN DISEÑO CERÁMICO CON ACABADOS METÁLICOS

Líderes en metalización PVD para azulejos

Con nuestra tecnología avanzada de PVD, creamos acabados metálicos de una profundidad y pureza excepcionales, superficies que destacan dentro del mundo de los materiales contemporáneos. Desde el oro y la plata hasta el bronce, el violeta y el azul navy, cada pieza refleja precisión y una artesanía impecable.

Nuestras baldosas porcelánicas de gran formato, disponibles en medidas de hasta 120×300 cm, son el toque sofisticado que el diseño interior y la arquitectura moderna necesitan para destacar. Sus tonos metalizados, esenciales para definir espacios contemporáneos, aportan una estética audaz pero equilibrada, con reflejos sutiles que transforman la atmósfera de cualquier ambiente.

Trabajamos con diversos proyectos, desde hoteles de alta gama hasta boutiques emblemáticas, nuestras piezas son reconocidas por su diseño innovador, texturas impactantes y carácter único. Cada proyecto se convierte en una declaración de estilo, donde convergen distinción, originalidad y un rendimiento duradero.

TIMELESS METAL FINISHES

ACABADOS METÁLICOS ATEMPORALES

Gold elegance, Lustrous Silver, contemporary Bronze for every space

La elegancia en oro, Plata Brillante y el Bronce contemporáneo para cada espacio

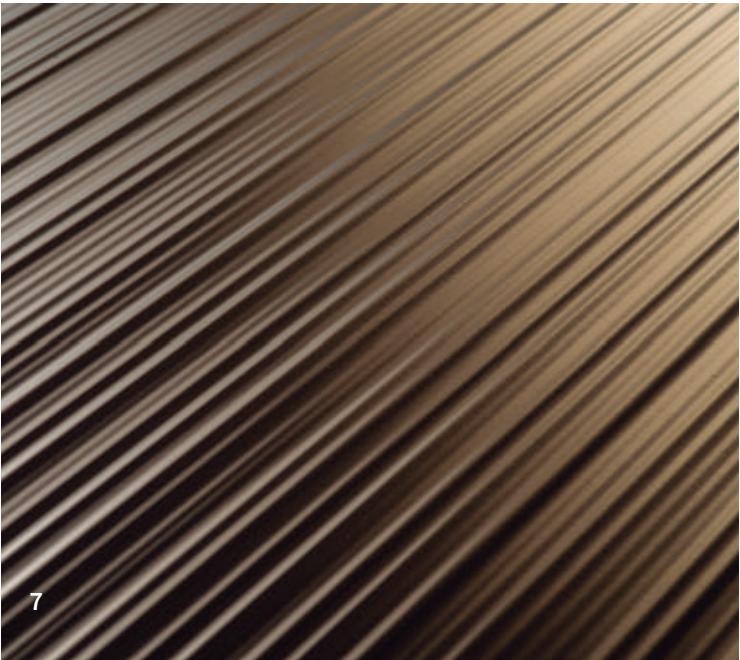

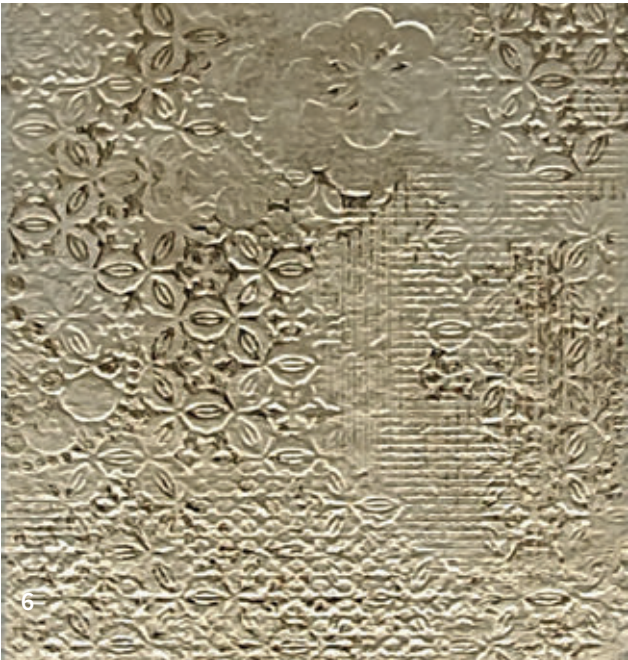

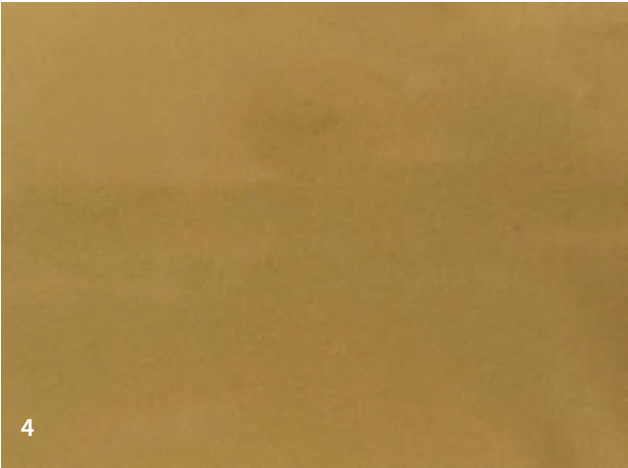

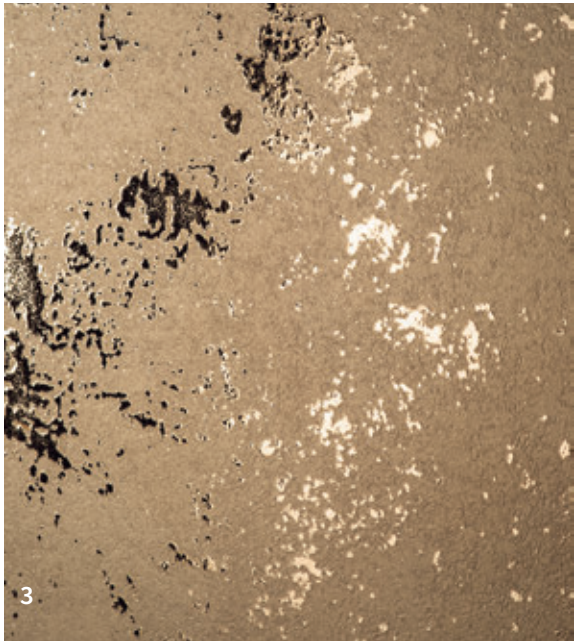

Discover the elegance of gold tones, the sophistication of silver, and the modernity of our metallic finishes, created using the latest PVD technology with high-purity titanium layers. This advanced process delivers surfaces with exceptional depth and luminosity, offering superior resistance and outstanding performance.

From a warm, sculptural gold to avant-garde shades such as violet or deep blue, each piece brings character, precision, and a contemporary aesthetic that transforms any space into a work of refined and distinctive design.

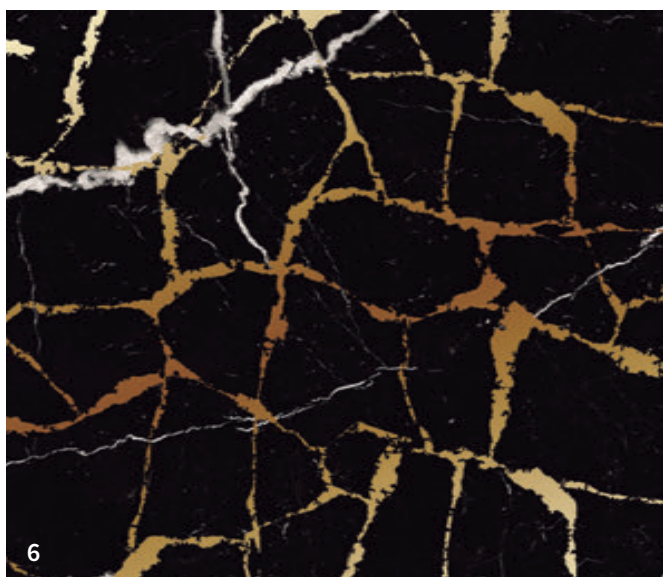

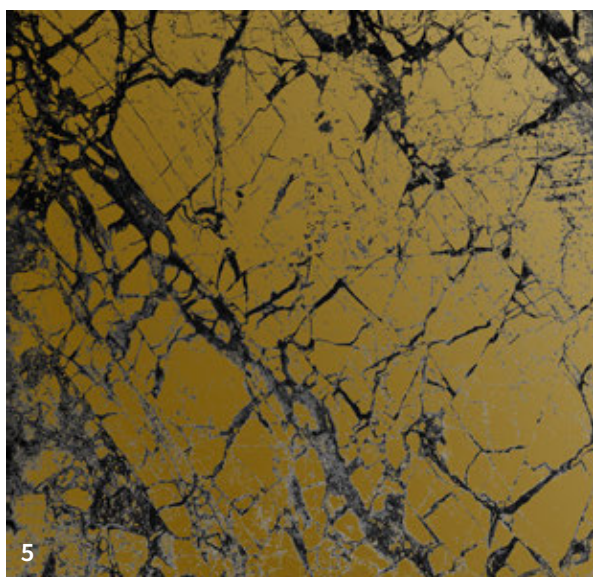

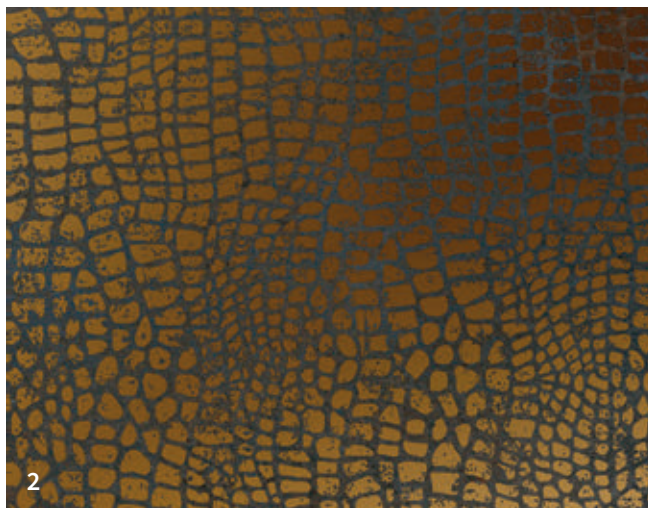

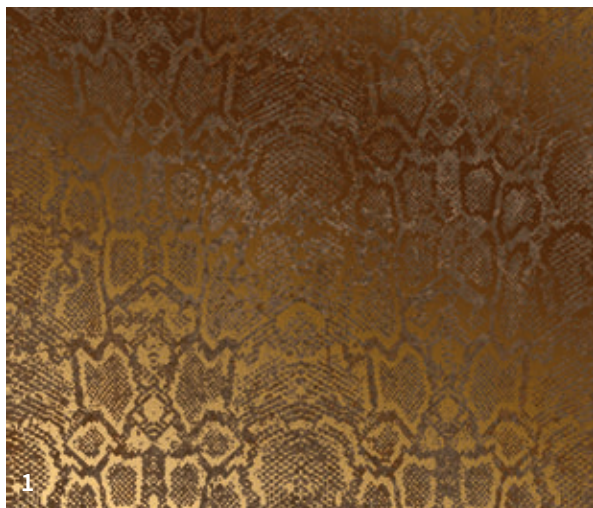

Descubra la elegancia del dorado, la sofisticación de la plata y la modernidad de nuestros acabados metálicos, creados mediante la última tecnología de PVD con capas de titanio de alta pureza. Este proceso avanzado permite obtener superficies de una profundidad y luminosidad excepcionales, con una resistencia superior y un rendimiento sobresaliente.

Desde un dorado cálido y escultural hasta tonos vanguardistas como el violeta o el azul profundo, cada pieza aporta carácter, precisión y una estética contemporánea que transforma cualquier espacio en una obra de diseño refinado y singular.

INKJET TECHNOLOGY ON CERAMICS

TECNOLOGÍA INKJET SOBRE CERÁMICA

High-precision design for more decorative pieces

Diseño de alta precisión para piezas mas decorativas

ROCED combines art and technology to deliver unique solutions in metallic screen printing. Our patterns, applied with precision on large-format surfaces, reflect our passion for excellence and innovation. With designs tailored to any concept, we empower our clients to stand out with pieces that transcend the ordinary. ROCED doesn't just manufacture tiles; we create visual experiences that leave a lasting impression.

ROCED combina arte y tecnología para ofrecer soluciones únicas en serigrafía metálica. Nuestros patrones, aplicados con precisión en superficies de gran formato, son el reflejo de nuestra pasión por la excelencia y la innovación. Con diseños que se adaptan a cualquier concepto, proporcionamos a nuestros clientes la posibilidad de destacar con piezas que trascienden lo convencional. ROCED no solo fabrica baldosas; creamos experiencias visuales que dejan huella.

WHERE DESIGN MEETS HIGH-END TECHNOLOGY

DONDE EL DISEÑO SE ENCUENTRA CON LA TECNOLOGÍA DE ALTA GAMA

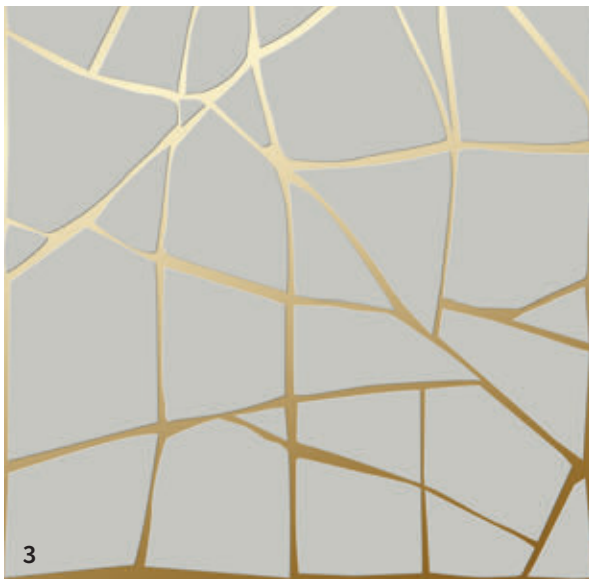

Metallic screen printing for the most ambitious projects

Serigrafía metálica para los proyectos más ambiciosos

At ROCED, metallic decoration is approached with precision and intention. Every piece is the result of advanced technology working hand in hand with thoughtful design. Whether the concept calls for subtle details or bold, expressive patterns, our textures and high-quality metallic finishes give each tile a clear identity and presence. With XXL formats and the flexibility of both PVD and inkjet techniques, we offer designers and architects the freedom to develop truly distinctive spaces.

En ROCED, abordamos la decoración metalizada con precisión y propósito. Cada pieza nace de la combinación entre tecnología avanzada y diseño consciente. Ya sea un proyecto que requiera detalles sutiles o patrones expresivos y audaces, nuestras texturas y acabados metalizados de alta calidad aportan a cada superficie identidad y presencia. Con formatos XXL y la versatilidad de las técnicas PVD e inkjet, ofrecemos a diseñadores y arquitectos la libertad de crear espacios verdaderamente distintivos.

INSTRUCTIONS FOR HANDLING, INSTALLATION AND MAINTENANCE

The PVD coating applied to ceramic surfaces is a high-end finish that requires specific handling and maintenance to preserve its appearance and durability. Tiles with metallic finishes-such as gold, silver, bronze, blue, or violet-may display slight shading variations between different tiles and even within the same piece. These tonal differences are inherent to the decorative technique and highlight its authenticity. The PVD process results in high-quality surfaces, each with a unique and unrepeatable visual effect.

WARNING

Handling must be carried out with care, as with any conventional ceramic piece, to avoid chipping, breakage, or any other damage caused by careless manipulation. ROCED pieces are designed for decorative use and must be installed by qualified professional personnel. If any piece shows a defect, do not install it; you must contact the supplier.

PRE-INSTALLATION RECOMMENDATION

Before installation, it is recommended to carefully inspect the condition of the tiles, ensuring that they are free from cracks, chips, or visible defects, and that the shades match those specified in the order. For handling, it is advisable to use cotton gloves to avoid fingerprints or surface contamination. For grouting the pieces, it is recommended to use fine-grain or controlled granulometry (CG- according to EN 13888) materials without additives.

RECOMMENDATION DURING INSTALLATION: Clean and Careful Placement

Place each tile in an orderly manner, avoiding the application of large amounts of adhesive on the surface. If any excess occurs, it must be cleaned immediately, before the material dries completely. To remove residue, it is recommended to use a soft sponge and clean water, then dry the surface thoroughly. Prompt cleaning is essential to achieve an optimal result. Always use a rubber mallet to avoid damage to the surface. Avoid direct contact between adjacent tiles during installation to prevent friction or impacts that may damage the finish. For grouting the pieces, it is recommended to use fine-grain or controlled granulometry (CG - according to EN 13888) materials without additives. Before the adhesive sets, carefully remove any remaining material using clean water. Do not allow cement to dry on the surface, as it may cause irreversible damage to the material.

POST-GROUTING RECOMMENDATION: Cleaning After Grouting

Once the grout has been applied, the surface must be cleaned immediately, before the material dries. Use clean water and a soft sponge to avoid damaging the tile's finish. If the grout is allowed to dry on the surface, removing the residue will be very difficult or even impossible.

CLEANING AND MAINTENANCE: PVO-Coated Surfaces

PVD-treated tiles can be cleaned using mild pH-neutral soap, standard glass cleaners, cleaning alcohol, diluted ammonia, or anti-limescale products in humid environments. Acidic or alkaline cleaners should not be used, as they may damage the finish. To prevent scratches, only soft cloths or sponges are recommended. After cleaning, it is essential to dry the surface thoroughly, as the accumulation of dirty water may cause permanent stains and negatively affect the coating.

* Claims for pieces will not be accepted once they have been installed.

INSTRUCCIONES PARA LA MANIPULACIÓN, COLOCACIÓN Y MANTENIMIENTO

El recubrimiento PVD aplicado sobre cerámica es un acabado de alta gama que requiere manipulación y mantenimiento específicos para preservar su apariencia y durabilidad. Las baldosas con acabados metalizados, oro, plata, bronce, azul y violeta poseen una ligera destonificación entre distintas baldosas y dentro de ellas mismas, cuyas características son propias de la técnica decorativa. Es una técnica donde el resultado origina piezas de una alta calidad únicas e irrepetibles.

Su manipulación debe hacerse con cuidado, como cualquier otra pieza cerámica convencional para evitar despuntados, roturas o cualquier otro daño debido a la manipulación descuidada. Las piezas ROCED están diseñadas para un uso decorativo y deben ser instaladas por personal profesional cualificado. La utilización de material abrasivo puede causar daños irreparables a las piezas. Si alguna pieza presenta algún defecto, no la coloquen, deben de comunicarse con el proveedor.

RECOMENDACIÓN ANTES DE LA INSTALACIÓN

Antes de la colocación, se recomienda revisar cuidadosamente el estado de las piezas, asegurándose de que no presenten roturas, desconchones ni defectos visibles, y que las tonalidades correspondan a las especificadas en el pedido. Para su manipulación, se aconseja utilizar guantes de algodón, con el fin de evitar marcas o suciedad en la superficie. Para el rejunte de las piezas se recomienda utilizar materiales de grano fino o granulometría controlada (CG -según EN 13888) sin aditivos.

RECOMENDACIÓN DURANTE LA INSTALACIÓN: Colocación limpia y cuidadosa

Colocar cada pieza de forma ordenada, evitando extender grandes cantidades de adhesivo en la superficie. En caso de que se produzcan excesos, deben limpiarse inmediatamente, antes de que el material se seque por completo. Para retirar los restos, se recomienda utilizar una esponja suave y agua limpia, y secar posteriormente la superficie. Es importante realizar la limpieza de forma inmediata para obtener un resultado óptimo. Para el rejunte se recomienda utilizar materiales de grano fino o granulometría controlada (CG -según EN 13888) sin aditivos.

Utilizar siempre una maza de goma para evitar daños en la superficie. Evitar el contacto directo entre piezas contiguas durante la colocación, con el fin de prevenir roces o impactos que puedan deteriorar el acabado. Antes del fraguado del adhesivo, eliminar cuidadosamente cualquier resto con agua limpia. No permitir que el cemento se seque sobre la superficie, ya que podría causar daños irreversibles en el material.

RECOMENDACIÓN POSTERIOR AL REJUNTE: Limpieza tras el rejuntado

Una vez aplicada la junta, la superficie debe limpiarse de inmediato, antes de que el material se seque. Utiliza agua limpia y una esponja suave, evitando así dañar el acabado de la pieza.

Si se deja secar el material de rejuntado sobre la superficie, la eliminación de residuos será muy difícil o incluso imposible.

LIMPIEZA Y MANTENIMIENTO: superficies con recubrimiento PVD

Las baldosas tratadas con tecnología PVD pueden limpiarse utilizando jabón suave con pH neutro, limpiacristales convencionales, alcohol de limpieza, amoníaco diluido o, en caso de ambientes húmedos, productos antical. No deben emplearse productos con pH ácido ni básico, ya que pueden deteriorar el acabado. Para evitar rayaduras, se recomienda el uso exclusivo de bayetas o esponjas suaves. Tras la limpieza, es fundamental secar completamente la superficie, ya que la acumulación de agua sucia puede generar manchas permanentes y afectar negativamente al recubrimiento.

* No se aceptarán las reclamaciones de piezas una vez instaladas.
